LAVANYA RAMAVATH

Hyderabad | 628-119-3820 | @leetcode | @mail | @linkedin | @github

Professional Summary

Detail-oriented and motivated aspiring AI/ML professional with hands-on experience in machine learning, data analysis, and visualization. Proficient in Python, SQL, Java, Pandas, NumPy, and Scikit-Learn, with experience building predictive models and end-to-end ML solutions. Skilled in Power BI, Tableau, and Matplotlib, with strong analytical, problem-solving, and communication skills.

Education

St. Martin's Engineering College	**B.Tech–CSE(AI-ML)** | GPA : 8.35	*september 2023 – may 2027*
State Board of Intermediate Education	**Intermediate** | GPA : 9.5	*june 2021 – May 2023*
Board of Secondary Education	**Secondary School** | GPA : 10.0	*June 2020 – may 2021*

Technical Skills

Languages :Python,SQL (Postgres, MS-SQL, MySQL),Java,HTML,CSS
Frameworks : Pandas, Numpy, Scikit-Learn, Matplotlib
Tools : Power BI, Excel, PowerPoint, Tableau, PostgreSQL
Platforms : PyCharm, jupyter Notebook ,Visual Studio Code
Soft Skills :People Management, Excellent communication

Experience

Artificial Intelligence Intern | *september 2025 – november 2025*

- Detecting Malicious Twitter Bots Using Machine Learning
- Developed a machine learning model in Python to detect malicious Twitter bots using user behavior, account metadata, and activity-based features.
- Performed data preprocessing, feature engineering, and implemented classification models including Support Vector Machine (SVM) and Random Forest.
- Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix, with visualizations created using Matplotlib and Seaborn.
- Implemented classification models including Support Vector Machine (SVM) and Random Forest to distinguish between bot and human accounts.
- Collected and cleaned Twitter dataset by handling missing values, removing noise, and preparing data for analysis.

Projects

Project 1 | *Ai-Powered Mindmapr : Intelligent Concept Linking And Revision Tool* — *jan 2026 – march 2026*

- Developed an AI-driven concept map generator to identify and link related AI/ML concepts for efficient learning and revision using semantic similarity with Sentence Transformers.
- Built and managed knowledge graphs using NetworkX to represent concept relationships, dependencies, and dynamically update connections for scalable concept mapping.

Project 2 | *FinTech AI-Driven Risk Scoring Model for Loan Approval* — *sep 2025 – nov 2025*

- Developed a machine learning–based loan approval prediction model using applicant and financial data, performing data preprocessing, feature engineering, and feature selection.
- Implemented and compared classification algorithms, including Logistic Regression and Random Forest, to accurately predict loan approval risk and minimize overfitting.
- Evaluated model performance using accuracy, precision, recall, and F1-score, and visualized insights with Pandas, Matplotlib, and Seaborn to support data-driven loan decisions.

Project 3 | *Netflix BI Analytics Suite* — *November*

- Developed an interactive Power BI dashboard by cleaning and analyzing Netflix content data using Power Query and DAX, creating KPI-driven visualizations to uncover trends in content, genres, ratings, and country-wise distribution for data-driven insights.
- Designed KPI dashboards and interactive visualizations with filters and drill-through features, enabling users to explore platform growth and content performance for data-driven decision-making.

Certifications

YUVA AI For All | *TCSiON*	*Feb 2026*
Artifical Intelligence | *EDIGLOBE*	*Jan 2026*
Sql for Beginners Learn SQL using MySQL and Database Design | *SCALER*	*June 2025*
Introduction to Generative AI | *GOOGLE CLOUD*	*April 2025*
Data Analytics Essentials (Certified) | *CISCO*	*March 2025*
Generative AI and CHATGPT | *GEEKS FOR GEEKS*	*Jan 2025*
